```
//If we type in this text:

<html ng-app="hello">
    <head>
    <script
    src="https://cdnjs.cloudflare.com/ajax/libs/angular.js/1.7.8/angular.min.js"></script>
    </head>

    <body ng-controller="helloCtrl">
    <!--  type in name, click button, 'Hello, Name' appears in div -->
    <input type="text" ng-model="cucumber" placeholder="Your name.."/>
    <button ng-click="click()">Click</button>

    <!--  conditional rendering: only render div if condition is truthy -->
    <div ng-if="cucumber">{{ output }}</div>
    </body>

    <script type="text/javascript">
    // initializes a module to use with ng-app
    angular.module("hello", []);

    // dependency example
    //angluar.module("hello", ["ngRoute"]);

    //no 'var app =' stuff
    angular.module("hello").controller("helloCtrl", function($scope){
    $scope.click = function(){
    var message = "Hello, " + $scope.cucumber;
    $scope.output = message;
    };
    });
    </script>
</html>
```

... this will give us:
